

## REMARKS

### I. Introduction

Claims 1-39 were rejected under 35 U.S.C. § 103.

Claims 1-39 have been canceled.

Claims 40-49 were added in December 3, 2004 and canceled without prejudice herewith.

New claims 50-72, added herewith, more particularly claim that which Applicant regards as the invention.

Support for the new claims may be found throughout the specification and originally filed claims. Specifically, support for the limitation of obtaining network data in claim 40 may be found at least on page 16, lines 15-27. Support for the limitation of tracking a location of wireless terminals in claim 40 may be found at least at page 16, line 15 through page 17, line 22. Support for the step of compiling profiling rules in claim 40 may be found at least at page 17, line 24 through page 18, line 5. Support for the step of compiling triggering conditions in claim 40 may be found on pages 18-20. Support for the limitations of claim 48 may be similarly found.

No new matter has been added.

### II. New Claims 50-72 Are Believed To Be Patentable Over The Prior Art

While Applicants appreciate the Examiner's discussion of U.S. Patent 6,647,257 to Owensby and U.S. Patent 6,449,621 to Pettovello, the combination of Owensby and Pettovello is not believed to render new claims 50-72 unpatentable. Particulary, neither Owensby nor Pettovello, taken alone or in combination, disclose or suggest all of the limitations of new claims 50-72.

**III. Conclusion**

Applicants submit that all of the claims are now in condition for allowance, an indication of which is respectfully solicited. If there are any outstanding issues that might be resolved by an interview or an Examiner's amendment, the Examiner is requested to call Applicants' attorney at the telephone number shown below.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made.
